

Washable diapers program 2019

DID YOU KNOW?

- 1) One child will use 6000 disposable diapers from birth to potty training, which equals to one ton of garbage. Using washable diapers will reduce the quantity of waste sent to landfill.
- 2) Disposable diapers take years to decompose.
- 3) Thousands of trees per year are cut down in Canada to make disposable diapers.
- 4) Disposable diapers use more water for production than washable diapers do. This water is disposed of and contains chemical pollutants.
- 5) You can save approximately \$1500.00 per child by using washable diapers.

ELIGIBILITY (details available at municipal office):

- 1) As of January 01, 2019, you must have a child of less than 6 months old or be pregnant.
- 2) Be a resident of The Nation Municipality.
- 3) Use washable diapers from birth to potty training.
- 4) Sign up before December 31, 2019.
- 5) Submit documentation in the first six months after birth.
- 6) Purchase a minimum of 20 new washable diapers during the year 2019.

APPLICATION FORM

Date: _____

Name of parent: _____

Address: _____

Telephone: _____
