**AUGUST 12, 2024**

## EXECUTIVE SUMMARY

This Engineer's Report has been prepared under Section 76 of the *Drainage Act, R.S.O. 1990, c. D. 17*. The purpose of this report is to update the assessment schedules associated with the Caledonia Creek Drain to allow for fair distribution of costs associated with future maintenance works.

This report has been prepared in anticipation of future maintenance works; with future maintenance to be scheduled and overseen by the Township's Drainage Superintendent. Through the update of this report, the Drainage Superintendent can undertake such maintenance as required, and assess costs in a fair manner across the landowners within the watershed.

The governing Engineer's Report for the drain is understood to have been authored in 1957 by H. R. Farley. The 1957 Engineer's Report describes that the Caledonia Creek Drain was an existing municipal drain. Under the 1957 report, the scope of work included the repair of fallen banks and realigning the drain at the East Half of Lot 18, Concession 5 (Geographic Township of Caledonia) to protect nearby buildings from being undermined.

Shade Group Inc. was appointed under By-Law No. 102-2023 to "update the existing 1957 plan and schedule of assessments of the Caledonia Creek Municipal Drain", with the by-law coming into effect as of September 30, 2023.

Per Section 85 of the Drainage Act, only works completed under Section 4, 74 and 78 are eligible for provincial grant. As such, the engineering works associated with the preparation of this report are not eligible as works have been performed under Section 76. Works associated with the proposed maintenance are expected to be conducted under Section 74, and with that, the construction (maintenance) works are expected to be eligible for grant.

The extent of maintenance works required shall be at the discretion of the Township's Drainage Superintendent. As the construction costs associated with such maintenance are not yet known, Shade Group has assigned an arbitrary valuation to the works with input from the Township's Drainage Superintendent. With that, the numbers used to prepare the assessment schedule for maintenance works are for illustration purposes only, to determine the apportionment of estimated costs assessed to each property. It is our understanding that maintenance works are anticipated to be on-going spot cleanouts or reinstatements as required, rather than a full cleanout of the entirety of the channel. With that, only those *upstream* of any performed maintenance would be assessed, but with the same apportionments as outlined on the enclosed assessment schedules.

A separate assessment schedule has been included in **Appendix D** based on approximate known costs (the engineering work). Note that engineering fees are estimated based on the assumption of no appeals; should there be appeals, whether to the Court of Revision, Tribunal or Referee,

the engineering fees would be subject to change as required to respond to and address appeals received.

Enclosed within the Appendices of this report you will find: a location plan showing the location of the watershed and drains (**Appendix A**); a map of the watersheds showing the Caledonia Creek Drain (**Appendix B**), the updated assessment schedule for the distribution of costs associated with future maintenance (**Appendix C**), and the assessment schedule distributing the one-time engineering costs for this report (**Appendix D**). The appointment by-law has also been enclosed in **Appendix E**.

## APPENDICES

APPENDIX A: LOCATION PLAN

APPENDIX B: WATERSHED PLAN

APPENDIX C: ASSESSMENT SCHEDULES – FUTURE MAINTENANCE

APPENDIX D: ASSESSMENT SCHEDULES – ENGINEERING

APPENDIX E: BY-LAWS

## 1.0 INTRODUCTION

This Engineer's Report has been prepared under Section 76 of the *Drainage Act, R.S.O. 1990, c. D. 17*. The purpose of this report is to update the assessment schedules associated with the Caledonia Creek Drain to allow for fair distribution of costs of future maintenance works.

This report has been prepared in anticipation of future maintenance works; with future maintenance to be determined, coordinated and overseen by the Township's Drainage Superintendent. Through the update of this report, the Drainage Superintendent can undertake such maintenance as required, and assess costs in a fair manner across the landowners within the watershed.

Changes have occurred within the watershed since the Caledonia Creek Drain report was last updated and as such, updates to the assessment schedules were necessary to allow for fair and correct billings of future maintenance works. Furthermore, numerous additional municipal drains had been constructed as tributaries to the Caledonia Creek Drain since the last adopted Engineer's Report, which required a review of the watershed boundary to ensure that those benefiting from the presence of the system are assessed accordingly.

Per the Drainage Act, the municipality is mandated to perform maintenance of petition drains adopted under the Drainage Act; but to do so, the associated paperwork (Engineer's Report) must first be confirmed to be up to date, accurate and fair.

A location plan showing the location of the Caledonia Creek Drain has been enclosed in **Appendix A**.

## 2.0 DRAIN HISTORY

Prior to undertaking this report, consultation was undertaken with the Township's Drainage Superintendent to acquire what is understood to be the governing Engineer's Report for the Caledonia Creek Drain.

Per the supplied information, we understand that the current governing Engineer's Report for Caledonia Creek Drain was authored in 1957 by H. R. Farley. The 1957 Engineer's Report describes that the Caledonia Creek Drain was an existing municipal drain (i.e. it was not newly petitioned in 1957). Under the 1957 report, the scope of work included the repair of fallen banks and realigning the drain at the east half of Lot 18, Concession 5 (Geographic Township of Caledonia) to protect nearby buildings from being undermined.

### 3.0 EXISTING CONDITIONS

#### 3.1 DESCRIPTION OF THE WATERSHED

The Caledonia Creek Drain watershed encompasses the following lands:

Geographic Township	Concession	Lots
Plantagenet	12	1
	14	A-D
Alfred	12	1-5 & GORE
	13	1-13 & GORE
	14	1- GORE
Caledonia	4	13-24
	5	1-24
	6	1-24
	7	1-LOT 8 & GORE
	8	1-LOT 8 & GORE
Kenyon	8	5-8
	9	1-6
Lochiel	9	33-38
West Hawkesbury	8	18-19
	9	17-19
	10	17-19

The impacted amalgamated Townships include The Nation, North Glengarry, Alfred and Plantagenet, and Champlain.

A plan view illustrating the watershed boundary is enclosed in **Appendix B**.

The Caledonia Creek Drain watershed is comprised predominantly of active agricultural lands, but also includes areas of rural residential development. A review of the soil composition, topography and/or terrain was not completed for this report as there were no noted concerns with the capacity of the current channel system, and as improvements would be considered outside the permitted scope of work associated with a Section 76 undertaking.

The Caledonia Creek Drain watershed boundary encompasses approximately 6,135 hectares.

#### 3.2 AREA REQUIRING DRAINAGE

For the purposes of this report, the “area requiring drainage” shall be considered the entirety of the adopted watershed as described in **Section 3.1**.

## 4.0 DRAINAGE ACT, 1990, PROCESS

### 4.1 TO DATE

Shade Group Inc. (Shade Group) was appointed under By-Law No. 102-2023 to “update the existing 1957 plan and schedule of assessments of the Caledonia Creek Municipal Drain”, with the by-law coming into effect as of September 30, 2023. A copy of the by-law has been enclosed in **Appendix D**.

Invitations to the on-site meeting were mailed to landowners within the watershed by Township staff. The meeting took place on November 1, 2023 at the St-Bernardin Community Centre at 6900 County Road 22, Vankleek Hill.

In the time leading up to the meeting, the Township's Drainage Superintendent fielded calls with respect to the intentions of the on-site meeting and inquiries about the proposed project. Furthermore, prior to Shade Group's appointment, the Township's Drainage Superintendent had undertaken consultation with numerous landowners within the watershed to discuss the concerns with the current assessment schedule, and to discuss options for resolution so that maintenance could be undertaken. Approximately 70 landowners attended the on-site meeting. Limited additional correspondence has been brought forth following the on-site meeting, to the best of Shade Group's knowledge, with additional correspondence being primarily limited to advising Shade Group of managed forest properties.

No concerns were brought forth at the on-site meeting with respect to the capacity or performance of the existing system, though some landowners noted concerns with erosion of the system. It is our understanding that the option for a Major Improvement process was presented by the Drainage Superintendent and discussed with landowners prior to Shade Group's appointment and the undertaking of such a process was deemed to be cost prohibitive by the landowners.

### 4.2 NEXT STEPS

Following the formal submission of this report to the Township, the report will be brought to a Meeting to Consider (Section 42).

The clerk of the municipality shall send a copy of the report and a notice stating the date on which the report was filed, the name or designation of the drainage works; and the date of the council meeting at which the report will be considered, to the prescribed people (Section 41).

The Meeting to Consider is held by council, and council may then adopt the report by provisional by-law by giving two readings (Section 45(1)).

Following the Meeting to Consider, and assuming a provisional by-law is adopted by two readings, a notice is sent, including a copy of the provisional by-law (exclusive of the Engineer's

Report) of the time and place for the first sitting of the Court of Revision. This notice is sent to each body or person as entitled under Section 41 of the Drainage Act.

Following the completion of addressing all appeals; or the time for appealing has expired, the council may pass the provisional by-law by a third reading. Work may then be commenced as early as ten days after the by-law is passed, if no notice of intention to make an application to quash the by-law has been filed with the clerk of the council (Section 58(1)), assuming any limitations for construction can be met at such a time (e.g. compliance with any permitting restrictions, timing windows, etc.).

Through discussions with Township staff, it is understood that the Township's Drainage Superintendent will coordinate and oversee any maintenance works required. The Township's Drainage Superintendent is also understood to be undertaking any contract administration, construction supervision, and final walkthrough, as required. The engineering involvement is expected to be limited to the preparation of this report to allow the Township to consider its mandated maintenance works under Section 74(1) of the Drainage Act.

### 4.3 RESOLUTION AND BY-LAW

**Appendix D** has been included in this report as a place to attach the applicable resolution and by-law associated with this Section 76 undertaking. The by-law from Shade Group's initial appointment has been enclosed with this submission; and it is recommended that the Drainage Superintendent (or applicable Township Staff) attach a copy of the report adoption by-law following its third reading for ease of future reference.

### 4.4 LIMITATIONS

The process overview provided in **Section 4.2** is provided as a general summary of the next steps to completion. Should the process described conflict with the specifications of the Drainage Act, the Drainage Act shall govern. The summarized process is provided as a courtesy, the Township clerk shall be responsible for ensuring that the applicable administration works are completed in accordance with the specifications of the Drainage Act.

### 5.0 PLAN, PROFILE & SPECIFICATIONS

It is intended that the profile and construction specifications of the governing Engineer's Report (1957) remain as the governing specifications for any future maintenance works.

This report shall serve only as an update to the *assessment schedule* to assess costs of future maintenance to those within the watershed.

A watershed map has been enclosed with this submission, which reflects the contributing area for the watershed to the best of our understanding. In addition to a desktop analysis, Shade

Group also conducted a visual field review of the watershed boundary as part of the preparation of this map.

Property ID numbers have been assigned to each property for ease of reference to the assessment schedule. The use of Property IDs rather than names offers protection of private information and affords continuity of use as property ownership can change over time.

## 6.0 MCMASTER/MACMASTER MUNICIPAL DRAIN

Part of the reasoning for the update to this Section 76 undertaking was also to account for overlapping drainage systems. The McMaster and MacMaster (both spellings can be found in the governing reports) Municipal Drain were adopted after the initial adoption of the Caledonia Creek Drain. Various reports for the McMaster/MacMaster were provided by the Township ranging from 1965 to 1974. It is our interpretation of these reports that the drain is comprised of the lower and upper sections. The upper drain affects Lots 4-7, Concession 9 and Lots 5-8, Concession 8, Geographic Township of Kenyon per the 1974 MacMaster Drain (Upper Section) map prepared by R.M. Kostuch Associates Limited. The lower drain affects Lots 1-6, Concession 8, Geographic Township of Caledonia per the plan of the McMaster Drain as prepared by Stidwill & Associates Limited in 1973.

A review of the Caledonia Creek Drain watershed in tandem with the watersheds for the McMaster and MacMaster Drains suggest that this length of watercourse has been adopted under multiple reports, with different names and differing assessment schedules. That is to say, this length of watercourse is referred to both as the Caledonia Creek Drain; and the McMaster/MacMaster Drains.

This Section 76 undertaking has been completed under the assumption that the Caledonia Creek Drain upper limit is at the municipal road between Concession 7 and 8 (Nation Township) at a total length of approximately 19,094m, terminating on the north side of the municipal road. The road crossing culvert is considered part of the MacMaster Drain (Lower Section) per the 1974 Plan for the MacMaster Drain. See the attached plan in **Appendix B** for more details. The drain *upstream* of this end point shall be considered the McMaster or MacMaster Drain – and maintenance (including assessment of costs) shall be addressed under a separate report.

## 7.0 ASSESSMENTS

Given the number of changes to the watershed, including land divisions (severances), changes in housing density, inaccuracies between overlapping watersheds, and additional tributaries (new municipal drains) an update to the assessment schedules for the Caledonia Creek Drain has been undertaken to fairly assess costs for current and future maintenance to all of those encompassed within the watersheds.

As per Section 21 of the Act, *"The engineer in the report shall assess for benefit, outlet liability and injuring liability, and shall insert in an assessment schedule, in separate columns, the sums assessed for each opposite each parcel of land and road liable therefor."* As this is an existing drain and the scope of works does not include any works that would be considered newly injuring to lands or roads, injuring liability is not applicable.

As the overall changes to the land use have been minimal *for lands directly abutting the drain*, and as it can reasonably be assumed that the overall benefit to outlet ratio of the drain can be considered to be relatively proportional today to that of 1957 (i.e. the benefit area has not measurably changed); the overall benefit assessment proportions have not been changed from that of the 1957 report, and have instead been reapportioned amongst the lands who meet the definition of such an assessment. Under the Act, lands eligible for benefits assessment are defined as those *"lands, roads, buildings, utilities, or other structures that are increased in value or are more easily maintained as a result of the construction, improvement, maintenance or repair of a drainage works may be assessed for benefit. R.S.O. 1990, c. D.17, s. 22."*

Finally, all lands within the watershed are assessed outlet liability, which is defined as *"lands and roads that use a drainage works as an outlet, or for which, when the drainage works is constructed or improved, an improved outlet is provided either directly or indirectly through the medium of any other drainage works or of a swale, ravine, creek or watercourse, may be assessed for outlet liability. R.S.O. 1990, c. D.17, s. 23 (1)."*

The method for determining the apportionment of benefit and outlet liability assessment is the responsibility of the appointed Drainage Engineer. The Drainage Engineer shall use their best judgement to determine an apportionment that is considered fair to all those assessed.

To assess outlet and benefit across the lands within the watershed, the Drainage Engineer has generally followed the Factored Areas Method. Under this method, the areas of land within the watershed are assigned factors based on land use, proximity to the drain (distance factor), and general location in the watershed (sub-section factor). The summation of these factors provides a factored area that allows lands within the watershed to be compared on what has been considered a fair basis. The appropriate factors are assigned by the engineer, on a case-by-case basis, as deemed appropriate and fair by the engineer.

The distribution of outlet versus benefit has been kept in the same general apportionments as that of the 1957 Engineer's Report.

Where roads or road allowances were located at a boundary of two Townships, the assessment associated with these roads was split into two – with half assessed to each adjacent Township.

## 7.1 LAND USE FACTORS

Each property was assigned a land use factor based on the most recent available aerial mapping and through further input from landowners or the Township, where applicable. The assigned values for the respective land use have been summarized in Table 1.

*Table 1: Land Use Factors*

Land Use Description	Factor
Agricultural / Vacant Land / Unprotected Forests	1.0
Commercial	4.0
Managed Forest	0.7
Large Lot Residential (>2ha)	1.0
Small Residential (<2ha)	2.0
Roads	2.0
Provincially Significant Wetlands	0.5

Unprotected forest refers to undeveloped lands that may include significant tree cover but are not registered as part of the Managed Forest Tax Incentive Program. Lands not registered as part of the Managed Forest Tax Incentive Program would be assigned the same factor as agricultural or vacant lands and they are not generally protected by current legislation to remain as forested lands.

Properties with wetlands were determined based on provincial mapping that describes Provincially Significant Wetlands (PSWs) and their associated mapped limits as these lands are afforded protection from development under current legislation. Unevaluated wetlands were not assessed as wetlands, as unevaluated wetlands are generally not automatically afforded the same level of limitations for development. While they may still have development limitations, that is generally only determined on a case-by-case basis (i.e. through a site-specific evaluation), which would be beyond the scope of this report.

## 7.2 DISTANCE FACTORS

Each property within the drain was assigned a distance factor based on offsetting measurements from the applicable channel. The distance factors for Caledonia Creek Drain are as follows:

*Table 2: Distance Factors*

Offset (m)	Factor
0 – 250	1.00
250 – 500	0.75
500 – 1000	0.50
> 1000	0.25

For Caledonia Creek Drain, the channel alignment was offset the respective amounts and the areas between the offsets were assigned the respective factors (see Table 2).

Each property was assigned a factor based on its location relative to the channel. Where properties were encompassed within multiple factor areas, a prorated factor value was established (e.g. if half the property is within the 250m offset and the other half within 250-500m; the property would be assigned a value of  $0.5 \times 1.00 + 0.5 \times 0.75 = 0.875$ ).

### 7.3 SUB-SECTION FACTORS

Each property was assigned a factor between 1.0 and 0.07 based on their relative location in the watershed. Properties farthest upstream (top of the watershed) benefit from the entire length of the drain and were assigned a factor of 1.0, while properties at the outlet of the drain only make use of a small relative section of the total system; and were assigned a smaller factor. Properties throughout the watershed were then assigned factors between 1.0 and 0.07 based on their relative location within the watershed. Factors were determined based on the approximate outlet station of where water from the property would be expected to enter the respective drain, and pro-rated accordingly.

For example, when calculating the assessments for Property ID No. 365 (see **Appendix B**) which drains into a tributary and then into Caledonia Creek at approximately Station 6+64, this would be calculated as follows:

$$(19,094 - 664) / 19,094 = 0.97$$

where 19,094 is the total length of the drain in meters and 664 is the point at which the McCrimmon Main drain enters Caledonia Creek Drain.

This calculation equates the total linear length of the drain used and assigns that value as a factor.

The summation of these factors (land use, distance, and sub-section) was used to determine an equivalent land area, which was used to determine the apportionment of the outlet liability assessment for each property.

### 7.4 BENEFIT ASSESSMENT

Lands adjacent to the drain were assessed for benefit liability. Benefit liability was calculated based on the land areas adjacent the drain within a 150m offset of the drain. These areas were then factored to take into consideration the land use. The final benefit assessment was calculated based on the percentage of the total factored benefit area.

The breakdown of outlet versus benefit remains consistent with the split used in the 1957 Engineer's Report, which suggests a split of 54% Outlet Liability vs. 46% Benefit Liability.

## 8.0 COSTS

### 8.1 CONSTRUCTION COSTS

The cost used for the assessment schedule was determined in consultation with the Township's Drainage Superintendent based on their intentions for maintenance over the coming years.

A value of \$50,000 was used as a hypothetical maintenance undertaking, as this is understood to be a value that would allow for spot repairs, etc. It is Shade Group's understanding (through consultation with the Drainage Superintendent) that a full, top-to-bottom maintenance undertaking of the entirety of the channel is *not* the intention at this time.

Where spot cleanouts are performed, only those upstream of the maintenance works would be assessed.

Schedules A through E are enclosed in **Appendix C** and are considered for future maintenance works.

### 8.2 ENGINEERING COSTS

The cost associated with the preparation of this report are estimated to be \$21,090 (exclusive of taxes). This estimate does not account for our involvement in any appeals to the Court of Revision, Tribunal or the Referee, but does include for attendance at the first mandated sitting of the Court of Revision. Responding to appeals, if applicable, would be subject to additional fees.

The assessment schedule for the engineering fees has been prepared slightly different from the assessment schedule for the maintenance/construction works. The distribution of costs has been based on all costs being considered as outlet liability only, rather than a split of outlet and benefit liability. When the distribution of benefit liability was included during an initial first draft, the assessments associated with the engineering costs were significantly biased towards those directly adjacent the drain. Although these landowners do benefit from the existence of the system and its continued maintenance and should continue to be assessed for both outlet and benefit liability for future maintenance, I did not feel that it provided a fair distribution of costs as it related solely to the preparation of this Engineer's Report. It is my opinion that these alternative assessments (Schedules F-J) represent a more fair, equitable distribution of costs amongst those within the watershed for the fees associated with preparing this Engineer's Report. Schedules F through J are provided as a courtesy to make it more clear for landowners to see their current assessment for this report – however Schedules F through J are considered one time use only and shall not be used for future maintenance.

Schedules F through J can be found in **Appendix D**.

Projects under Section 76, including the preparation of this report and the associated assessment schedules *are not* eligible for provincial grant.

## 9.0 ADIP GRANTS

Properties that are registered with the Ontario Ministry of Agriculture, Food and Agribusiness (OMAFRA) for the Farm Property Class Tax Rate Program may be eligible for a 1/3 grant from the Province. As eligibility requires active status with OMAFA, the grant has not been reflected on current assessment schedules. If you have any questions on whether your property is eligible for grant, please contact the Township's Drainage Superintendent.

As per Section 85 of the Drainage Act, only projects performed under Section 4, 74 and 78 are eligible for provincial grant. With that, the engineering costs associated with this Section 76 report are not eligible for grant. Maintenance works hereafter are to be performed in accordance with the original Engineer's Report (1957) and the construction maintenance works would be considered as works performed under Section 74 and would be expected to be eligible for grant.

## 10.0 CLOSING

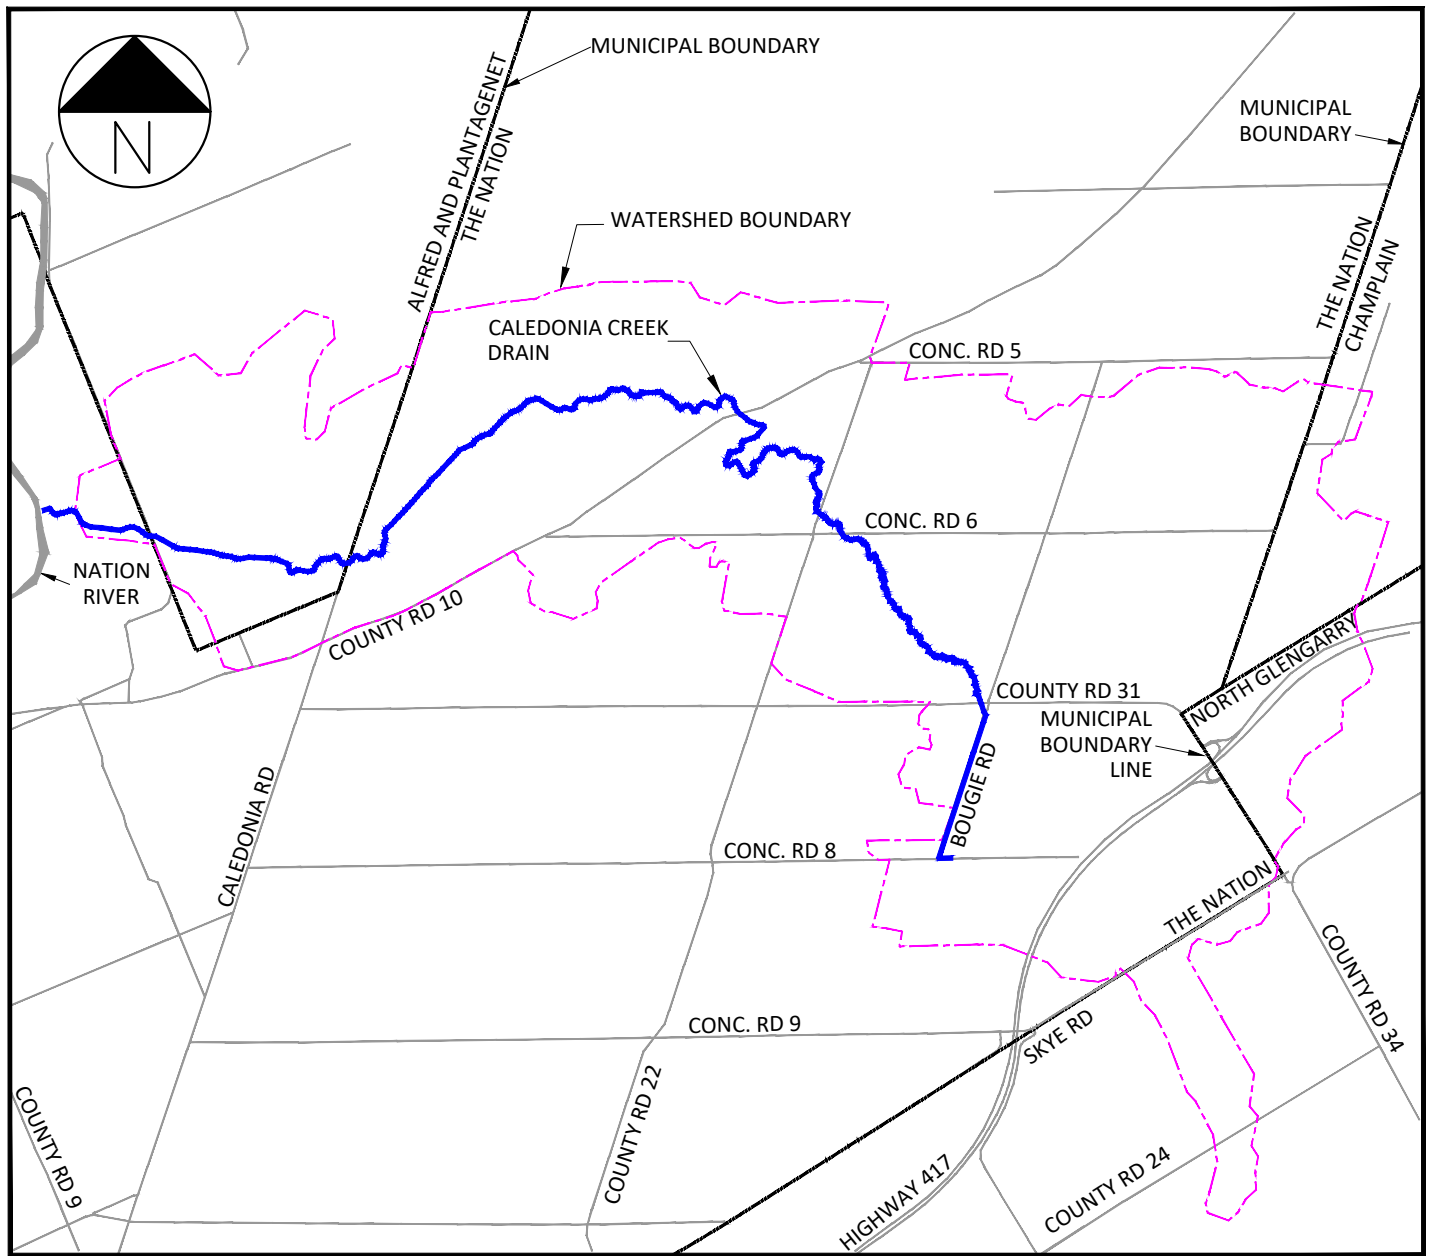

This Section 76 Engineer's Report for the Caledonia Creek Drain is respectfully submitted to the Council of the Nation Municipality for consideration, in fitting with the processes outlined under the Drainage Act.

## **APPENDIX E**

### **BY-LAWS**

**CORPORATION OF THE NATION MUNICIPALITY**

**BY-LAW NO. 102-2023**

Being a by-law to appoint engineer's firm Shade Group Inc. to update the existing 1957 plan and schedule of assessments of the Caledonia Creek Municipal Drain.

---

**REFERENCE:** Section 76(1) of the Drainage Act, R.S.O. 1990, c. D. 17, varying original assessments for maintenance.

**WHEREAS** the Caledonia Creek Municipal Drain was constructed in 1957, in accordance with By-Law No. 10-1957.

**WHEREAS**, pursuant to Section 76 (1) of the Drainage Act, The Nation Municipality deems it appropriate and beneficial to update the plan and schedule of assessment to give the tools to the municipality to provide maintenance work where needed and to help remove obstacles causing erosion along the steep sections. It is mostly to prepare a new report with a new watershed limit plan, and parcels of land that are reflecting the actual sizes and information of the land.

**AND WHEREAS** it is necessary and appropriate for Council to appoint a Drainage Engineering firm, under Section 76 (1) to update the plan, and new schedule of assessments of the Engineer's report of August 30, 1957, of the Caledonia Creek Municipal Drain to be used for future maintenance. Also, to review of watershed boundary.

**AND WHEREAS** the actual cost of the preparation of the Engineering Report of the Caledonia Creek Municipal Drain is to be shared by the owners of land within the Caledonia Creek Municipal Drain watershed.

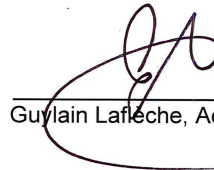

**NOW THEREFORE** the Council of The Corporation of The Nation Municipality, hereby enacts as follows:

1. THAT Council appoints the engineer's firm Shade Group Inc. to update the existing 1957 plan and schedule of assessments of the Engineer's Report of the Caledonia Creek Municipal Drain as per the proposal of August 3, 2023.
2. THAT the landowners within the Caledonia Creek Municipal Drain watershed be responsible for the costs of the revised Engineer's Report.
3. THAT by-law shall come into force as of September 30, 2023.

READ A FIRST, SECOND AND DULY PASSED UPON THE THIRD READING IN OPEN COUNCIL THIS 25TH OF SEPTEMBER 2023.

Francis Briere, Mayor

Guylain Lafleche, Acting Deputy Clerk
